- formal continuing education
- informal learning / training on the job

Training duration

Hours (if relevant, i.e., VET courses): 4 days

Level of education required

- Secondary school/ Vocational qualification
- High school diploma
- Degree

Main content of the program (4-5 lines)

Basics and objectives of energy management systems, including ISO 50001 and DIN EN 19011

- Duties of energy auditors and issues relevant to internal and external audits on energy management
- Establish audit programs, the role, responsibilities and activities of an energy auditor and the legal framework for compliance audit
- Conducting an audit, documentation techniques, interviewing and interrogation, active listening and managing difficult conversations
- Post-processing of the audit, its evaluation and documentation
- Follow the recommendations for corrections
- Advantages and disadvantages of an integrated audit

As the validity of a certification as an energy auditor is three years, at least eight hours of study per year are required for further training in order to obtain the extension of the certification. In this regard, we can offer you a wide range of additional courses from our portfolio of training in energy management.
