- formal continuing education
- informal learning / training on the job

Training duration

Hours (if relevant, i.e., VET courses): 720 hours, of which 240 hours of theoretical training and 480 hours of practical training

Level of education required

- Secondary school/ Vocational qualification
- High school diploma
- Degree

Main content of the program (4-5 lines)

Depending on the specialization, the isolation workers perform:

Thermal insulation - which aims to minimize heat or cold losses from the components of technological installations and industrial equipment or the components of the roof of some buildings;

Sound insulation - which ensures the protection of the premises from outside noise or the sound insulation of the spaces where noise-producing activities are carried out in order to avoid disturbing the working and living environment in the neighborhood or which ensures the sound performance of some rooms that require amplification conditions and specific sound targeting, echo elimination and improving the IQ;

Water-repellent insulation - through which the aim is to ensure the watertightness regardless of the origin and the pressure it exerts, as well as to ensure the stability and durability of the waterproofing on the support through their appropriate protection;

Targeted public: Who is interested

Pedagogical methods

- workshops
- conferences
- placement
- practical exercises
- distance learning

Evaluation process

- diploma
- certification
- attendance confirmation
- no evaluation
